- Design and development of internal and customer websites using Microsoft technologies
- Provided SEO analysis, content creation and website structure refactoring for clients

About Me

In short: My name is Tyler Jackson and I'm a web developer with over ten years experience. With a passion for business and technology, I do my very best to keep things concise, clean, well thought out and overall, useful. I love the world of web development. The community. The tools. The knowledge. The struggle. The reward. Every part of it.
